

GLSEC 2009

November 16 : Tutorial Schedule

	Willow East/West	Oak Room	Board Room
8:30	<p>Karen Johnson: Using Test Pairing as a Method</p> <p>The tutorial begins with an overview of different “types” of testing including: manual, automated, functional, performance, regression and more. This overview is a helpful introduction for new testers to identify and understand different types of testing. The tutorial offers a refresher for more experienced testers.</p> <p>The tutorial continues with an investigation into different methods of conducting a test analysis.</p>	<p>Jeremy Anderson: Introduction to FLEX</p> <p>Jeremy Anderson is currently co-authoring the book on Flex On Java for Manning Publications (http://manning.com/allmon).</p> <p>There has been a lot of buzz surrounding Rich Internet Application (RIA) platforms like Flex for some time now, and many books written on how to do Flex development, however much of what’s being taught just will not scale beyond the trivial examples. Even the more popular MVC frameworks are fraught with fragile architecture, untestable code and anti-patterns.</p>	<p>Patrick Bailey: Power Up with Powershell</p> <p>The tutorial will include the following:</p> <ol style="list-style-type: none"> Basics <ul style="list-style-type: none"> * History and Powershell's environment * Exploring cmdlets (command-lets) * Powershell's alignment with .Net Programming in Powershell <ul style="list-style-type: none"> * Basic constructs and features * Script blocks and functions * Scripts and Error/Exception handling
12:00	Lunch		
1:00	<p>Ron Jeffries & Chet Hendrickson: Natural Laws of Software Development</p> <p>We offer the beginning of a unified theory of software development.</p> <p>Starting from simple and commonly-held assumptions, we will explore the dynamic behavior of a software project, and will derive both management practices, and technical practices, as the inevitable consequences of iterative software delivery.</p>	<p>Jeff McWherter: Testing for the Web (Performance, Accessibility etc)</p> <p>This session will discuss, in detail, the types of web testing disciplines that all web developers should be aware of. With so many testing disciplines out there, and so little time to cover them, this session will briefly discuss each discipline and then drill into Performance Testing, Accessibility Testing and Security Testing in more depth.</p>	<p>Becky Bertram (Microsoft MVP): Help! I’ve Got a Sharepoint Site! Now What?</p> <p>This tutorial will help you understand the types of issues you’ll need to consider when rolling out a SharePoint solution. We’ll be covering topics such as:</p> <ul style="list-style-type: none"> * What is SharePoint? What does it do? * The difference between Windows SharePoint Services (WSS) and Microsoft Office SharePoint Server (MOSS) * Customizing Sharepoint * Features of Sharepoint 2010
4:30	End of Day
